

ROHINI SCIENCE CLUB 5.0

Celebrating Glorious

500

Years

2014-2023 (5.0)

The experience of last four decades gave us an opportunity to take up science and technology at the doorsteps of the last mile communities to empower those using innovative ideas with low cost teaching and learning materials.

2004-2013 (4.0)

During the process of empowering educational institutions, the global digitilisation movement encouraged us to develop e-content for the generation next. The software developed was named as e-Budhni recognised as best e-content in South Asia (Recipient of Manthan Award -2009).

1994-2003 (3.0)

The activities have been widened by reaching out to the schools and communities, with a focus on science education through imparting training on different themes to the students as well as teachers covering different districts and states.

1984-1993 (2.0)

School boys, who participated at the National and Regional Science Fairs, became the organizers of similar exhibitions with new concepts like VIGYANOTSAV later, where they demonstrated their skills with passion and a mission to carry forward the science movement among students covering varied nature of educational institutions.

1973-1983 (1.0)

Founders of RSC, who were the school boys then, appreciated for their original ideas at the National Science Exhibitions, came back with dreams to continue the love for science by forming a science club.
